SUMMARY

Android developer building commercial apps in Kotlin since 2018. I have worked on e-commerce apps with millions of users (Reserved, Sinsay, Big Star) and now on ErgData, Concept2's official app that talks to its fitness machines over Bluetooth LE. I care about stability, performance and code a team can keep changing for years, and I am used to being the Android team's main contact for the client.

2018
building Android apps commercially

16M+
Google Play installs of apps I worked on

99.9%
crash-free sessions on ErgData

8+
apps shipped to Google Play

EXPERIENCE

Angry Nerds — Android Developer

May 2025 – present

- Android developer on Concept2 ErgData (500K+ Google Play installs, 10K+ daily active users), working directly with the client's team on requirements and solutions
- Keep the app stable: 99.9% crash-free sessions and a 0.03% user-perceived ANR rate
- Bluetooth LE communication with the PM5 monitor, including recovery when the connection drops mid-workout
- Tracked down hard production bugs, such as an ANR from LibGDX resources outliving their screen and workouts stuck saving after a BLE drop
- Migrated state from LiveData to StateFlow and covered ViewModels with unit tests (MockK, Turbine); automated the PR workflow in GitHub Actions

Future Mind — Android Developer

Feb 2021 – May 2025

- Four years on large e-commerce apps, from new features to maintenance and production support: Reserved (5M+ installs) and Sinsay (10M+) for LPP, and Big Star (500K+)
- De facto Android lead on Big Star, owning technical decisions and client communication
- Main point of contact for the Android team on client projects
- Built MirrorCheck, an SDK that checks a phone's screen for insurance, embedded in the Play and Plus apps
- Worked with product and design on analysis and planning in Scrum teams

21CN — Android Developer

Jan 2020 – Feb 2021

- Built three apps: Zapłać Mi (tracking debts among friends), MrBuggy for the TestingCup 2020 championship and the Software Testing App
- Used MVVM throughout and mentored a junior developer

Ebicom — Junior Android Developer

Feb 2018 – Jan 2020

- Projects for European clients, including CRM-AutoPartner, an app for field sales reps
- Worked closely with UX designers in a fast-moving startup

CINiBA, Katowice — Internship, web applications

Jul 2016

- Worked on a system for managing the academic library network

SELECTED PROJECTS

- **ErgData** — Concept2's official app for RowErg, SkiErg and BikeErg; BLE, Jetpack Compose, LibGDX race mode, Health Connect
- **Reserved**, **Sinsay** and **Big Star** — fashion e-commerce apps
- **MirrorCheck SDK** — phone screen inspection inside the Play and Plus apps
- **MrBuggy** (plus a demo) and **Software Testing App** — training apps for manual testers
- **Plotbond** — my own product: a cross-platform app for tabletop RPG groups, planned for web, desktop, Android and iOS; now validating the idea with a survey and a waitlist

SKILLS

Android & UI: Kotlin, Java, Jetpack Compose, Android Views, Navigation
Architecture & async: MVVM, Clean Architecture, modularization, Coroutines, Flow / StateFlow, LiveData
DI, data & network: Hilt, Dagger, Koin, Retrofit, OkHttp, Room, WorkManager
Platform & hardware: Bluetooth LE, Health Connect, LibGDX, Firebase (Auth, Firestore, Crashlytics, Analytics), Sentry
Testing & delivery: JUnit, MockK, Turbine, Gradle, GitHub Actions, Bitrise, Google Play Console
Also: Kotlin Multiplatform (internal talks for my Android team), AI-assisted development (GitHub Copilot, Claude Code), client communication, mentoring, Scrum

EDUCATION

University of Silesia in Katowice
Engineer's degree (BEng) in Computer Science, 2014–2019
Thesis project: Android app for the animal shelter in Sosnowiec

Certificate: AI in Business Development

LANGUAGES

Polish (native) · English (professional working proficiency)

INTERESTS

Sailing (Greece, Croatia, Sweden), singing in a vocal ensemble, guitar, horseback riding
